Sophie Brahe (1556–1643) var Danmarks første kvindelige astrolog

Paul Choissnard

den franske pioner

FAGHISTORIE

af Claus Houlberg

Det er lykkedes Astrologisk Museum at komme i besiddelse af et fotografi af den astrologiske pioner, Paul Choissnard [1867-1930]. Det er indtil videre det eneste, vi

kender til. Han står her i en park sammen mellem *George Sand's* døtre og en god ven (til højre). Fotografiet synes taget sidst i 1890'erne, hvor Choissnard er knap 30 år gammel. Han er omtalt som 'astrologen Paul Choissnard' og er allerede ved at skabe sig et navn som astrolog. Næsten samtidig, i året 1898 skriver han sin berømte artikel, hvor han

s. 3: Videnskabelige artikler

i ungdommeligt overmod påstår, at "Selvfølgelig kan astrologien bevises statistisk af enhver kompetent astrolog." Denne påstand har især franske astrologer kæmpet med at bevise lige siden.

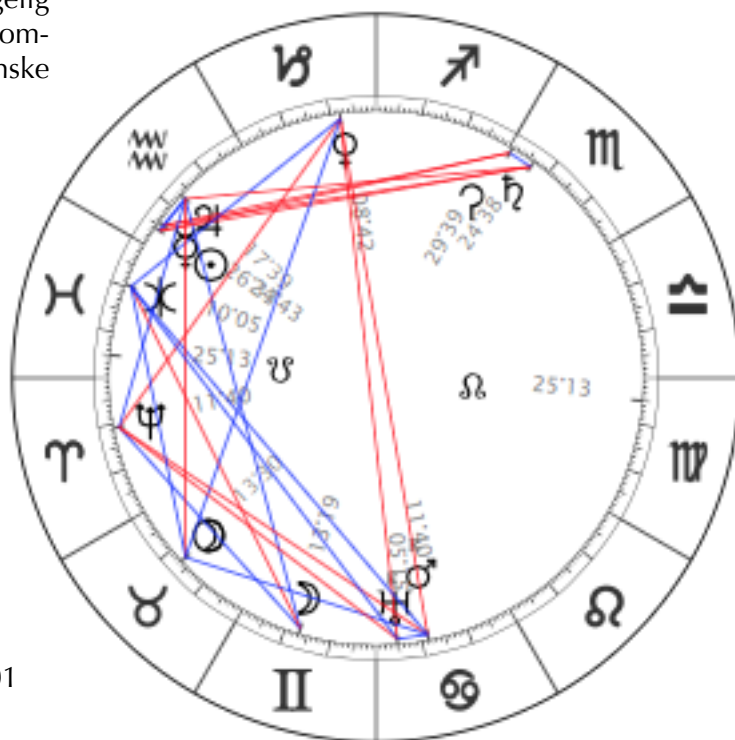

Den franske skole

Faktisk kan man hævde, at der er herfra udgår en fransk 'skole' inden for den videnskabelige astrologi. Den rummer en perlerække af dygtige folk som *Karl Ernst Krafft* [1900-45] og ægteparret *Françoise Gauquelin* [1929-2007] og *Michel Gauquelin* [1928-91] som de kendteste navne herhjemme. Choisnard selv skrev fire og tyve bøger om astrologi, heraf en lille håndfuld, der i dag er klassikere, og som langt hen ad vejen definerer, hvad vi i dag forstår ved videnskabelig astrologi. Det drejer sig blandt andet om:

- **Influence astrale** (Stjerne-indflydelse). 1901
- **Langage astral** (Stjerne-sprog). 1902
- **Étude nouvelle sur l'hérédité** (Nye studier i arvelighed). 1903

Heraf er kun det sidste værk om arvelighed blevet oversat til dansk, hvilket skete i 2013, hvor den blev udgivet af Astrologisk Museum. Dansk titel: *Arvelighed - i nyt astrologisk lys*. Bogen er den første herhjemme, der er publiceret om SLÆGTS-ASTROLOGI, ligesom den var ved sin udgivelse i Frankrig. Uanset at bogen er over hundrede år gammel virker den meget nutidig i hele sin tankegang og i sit sprog. Ud over bøger udgav han

1903-14 et lille tidsskrift om den videnskabelige astrologi, navngivet efter sin første bog *Influence astrale*. Få år før sin død stiftede han 1926 i Bruxelles et selskab sammen med den næsten tredive år yngre belgiske astrolog *Gustave Lambert-*

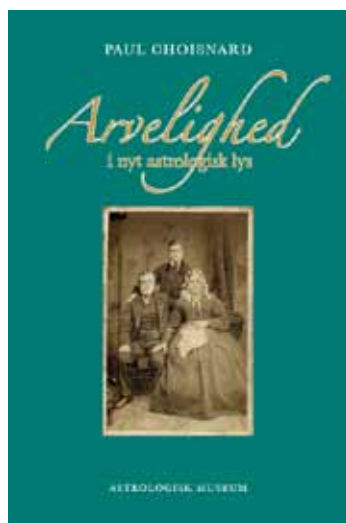

Brahy [1894-1989]. Selskabet navn var CÉBÉSIA, hvilket var en forkortelse af Centre Belge d'Etude Scientifique des Influences Astrales (Belgisk Center for Videnskabelige Studier af Stjernernes Indflydelser). Han var som Choisnard uddannet polyteknisk ingeniør, så de har været på bølgelængde med hinanden. Efter Choisnards død stiftede Lambert-Brahy instituttet *Central Belge de Recherches Astro-dynamiques* (Belgisk Center for Astro-Dynamisk Forskning), hvor begrebet astrodynamik var Lambert-Brahys foretrukne emne. Han skrev i alt fjorten bøger om astrologi, heraf en del om finansastrologi.

Horoskopet

Paul Choisnard blev født den 13. februar i byen Tours i Frankrig. Vi har ingen fødselstid, så der kan alene opstilles et blindhoroskop (husløs tegning). Han havde også et andet navn, for mens han var i militæret (major i artilleriet) benyttede han sig i øvrigt af pseudonymet *Paul Flambart*, når han skrev om astrologi. Først efter han trak sig tilbage herfra benyttede han sit fødenavn.

Choisnard havde tydeligt Tvillinge-præg i sin statur (se billedet), så hans Måne i Tvillingerne må have været i kontakt med hans Ascendant på en eller anden måde. 🍏

Videnskabelige artikler om astrologi fra det 20. århundrede

Denne foreløbige bibliografi er indsamlet af Astrologisk Museum på basis af en bibliografi, opstillet af forskningsudvalget under Dansk Astrologforening tilbage i 1998.

Museets forskningstidsskrift *Cornelius* udgav tilbage i sit nr. 3 af 2003 en bibliografi, kaldet 'Universitetsastrologi', med mere end 100 doktordisputatser, der i det 20. århundrede har handlet om astrologi. Den bibliografi må ses sammen med den foreliggende for at give et mere fuldstændigt billede af området.

Bibliografien er opstillet omvendt kronologisk (nyeste først) og opdelt efter emne i hovedgrupperne Naturvidenskab og Humanvidenskab.
